

LOOKING FOR TIPS FOR BETTER CO-OPERATION WITH YOUR CHILDREN?

Let's face it, we all want to be the best parent we can be – yet there are times when we just don't know what to do or say to get the best co-operation from our children. You may have heard of the expression 'it would be easier if children came with manuals' –well, actually they kind of do – we just have to know what to look and listen for from our children to know what they need.

MAGIC MOMENTS

Kapiti Parents Centre is really excited to offer our parenting course **MAGIC MOMENTS**. This is a three-module course which will give you some tips for:

- better communication and co-operation with your children
- using non-physical ways of discipline
- tips on building strong and caring relationships with children whilst giving clear boundaries

The information presented in the **MAGIC MOMENTS** course is research-based using the SKIP principles. You will receive tips that you can implement within your family context. The tips are uncomplicated, undemanding, straightforward and simple. This course is fun, interactive, non-judgemental, and informative. You will receive a workbook which is yours to keep.
